

YOU ARE INVITED to participate in a panel discussion

Sponsored by the Teachers College Columbia University Nursing Education Alumni Association (TCNEAA)

The COVID-19 Pandemic: Catalyst for Re-Envisioning Nursing Education

August 12, 2020 (12:00 pm to 2:00 pm EDT via ZOOM)

This Faculty Forum offers the opportunity for nursing faculty and practice colleagues to come together to discuss how the pandemic can be viewed as a stimulus to re-think our approaches to nursing education. Panel members will address questions such as the following:

- How might our curricula, course delivery, and clinical experiences need to change?
- What innovative and engaging approaches are most effective to facilitate learning for diverse student populations?
- How can academic/practice partnerships be maximized to create new approaches to clinical learning?
- How can we best support student transition to practice and help them develop as leaders?
- How can we best prepare students to effectively manage in uncertain, ever-changing environments?
- What kind of initial and ongoing faculty development is needed to enact educational change and innovation?
